Claim Rejections - 35 USC § 112

1. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 24 depends from itself and hence the examiner cannot examine the merit of the claim without knowing the proper dependency. Also, the phrase “first named seal are and said at least one kiss cut” is awkward in claim 24. For the purpose of this Office Action, claim 24 depends from claim 12, but applicant has to amend the claim to avoid duplicate claims (13,24).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 12 and 23 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Sfikas (US 4,549,658) in view of Youngs (US 5,588,527) and/or Official Notice. Sfikas discloses a package and a disk. The package has a lower layer of flexible plastic material 10 and the disk is positioned on the lower layer. An upper cover layer 12 is sealed to the lower layer along seal lines 14. An adhesive 42 is located on an outer surface of the lower layer to facilitate fixing of the package to a substrate 50. A peel off liner 44 is fixed to the adhesive. Although Sfikas shows a mini disk, it would have been obvious to substitute an optical disk for the mini

disk as taught by Youngs to store within the package for transport. Youngs teaches a storage container with layers 30,32,36 sealed around the peripheral thereof to form a pocket. The kiss cut is formed within the sealed area. Also, Official Notice is taken of the conventional sealing of two layers of material to form a desired compartment with similar configuration as the intended article. It would have been obvious in view of Youngs and Official Notice to form a substantially circular seal around the modified Sfikas with a compact disk therein to accommodate the disk.

Allowable Subject Matter

4. Claims 1-11, 15-22 are allowed.
5. Claims 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3728

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
